

# DISABILITY MANAGEMENT INFORMATION SYSTEM – RWANDA

## CHALLENGE

Absence disaggregated disability data  
 Lack of knowledge barriers & needs  
 No evidence for informed decisions  
 Challenge implementation SDG commitments  
 Lack of oversight disability service providers

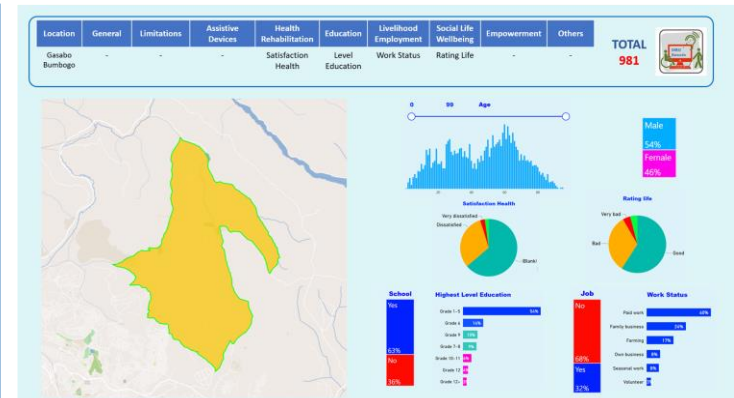

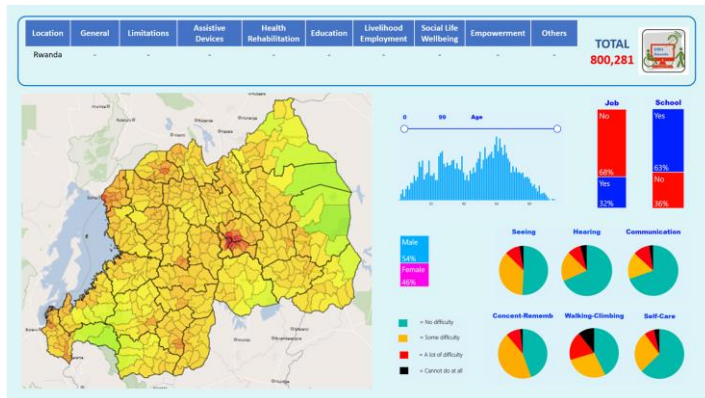

## DISABILITY

### IDENTIFICATION & REGISTRY CASE-MANAGEMENT

Integrated in 1 digital transformation tool to improve living conditions of persons with disabilities

## OBJECTIVE

To develop a digital transformation system which will support the Government of Rwanda and key stakeholders for evidence based inclusive policies, increased accountability, improved service delivery, and better coordination

## FUNTIONALITIES

Disability identification and registry  
 Individual digital limitation profile  
 Interactive dashboards with SDG indicators  
 Eligibility for social support & benefits  
 Case management support and M&E

## IMPACT

DMIS will support stakeholders in the disability sector to make coordinated and well planned, targeted and evidence-based support plans and advocate for change towards equal participation of persons with disabilities

## OPPORTUNITIES

Scalable & adaptable to different needs  
 Frontrunner inclusive digital transformation  
 Pilot for UN disability statistics  
 Adjustable for disability self-registration  
 Part of digital social protection MIS
